Engineer a smarter future faster

As a focused technology company, we empower our customers to transform their industries and markets, helping them to transform the everyday

**303,000**  
employees<sup>1</sup>

**€62.3 bn**  
in revenue<sup>2</sup>

**€6.7 bn**  
in net income<sup>3</sup>

**15.0%**  
adjusted EBITA margin  
for the Industrial  
Businesses<sup>2</sup>

<sup>1</sup> As of September 30, 2021 | <sup>2</sup> For fiscal 2021 | <sup>3</sup> Continuing and discontinued operations

# Siemens Digital Industries Software is a leader by any measure

## TOP RANKED

# #1

industrial software  
for the digital enterprise

## EXPANDING ECOSYSTEM

# 220k+

Ecosystem  
developers

## REVENUE

# \$4.2B

DI SW, 2020

# >60%

Recurring revenue

## FORTUNE MAGAZINE

# Most admired

industrial company

## M&A INVESTMENT

# €11B

Since 2007

# Siemens Digital Industries Software continues to expand its portfolio with huge investment to combine the real world with the virtual world

**Siemens EDA is aggressively strengthening its portfolio with key acquisitions**  
**Significant increase in R&D and M&A investments in select technologies**

**AUSTEMPE  
R DESIGN**

# Siemens EDA

Engineer a  
smarter future  
faster...

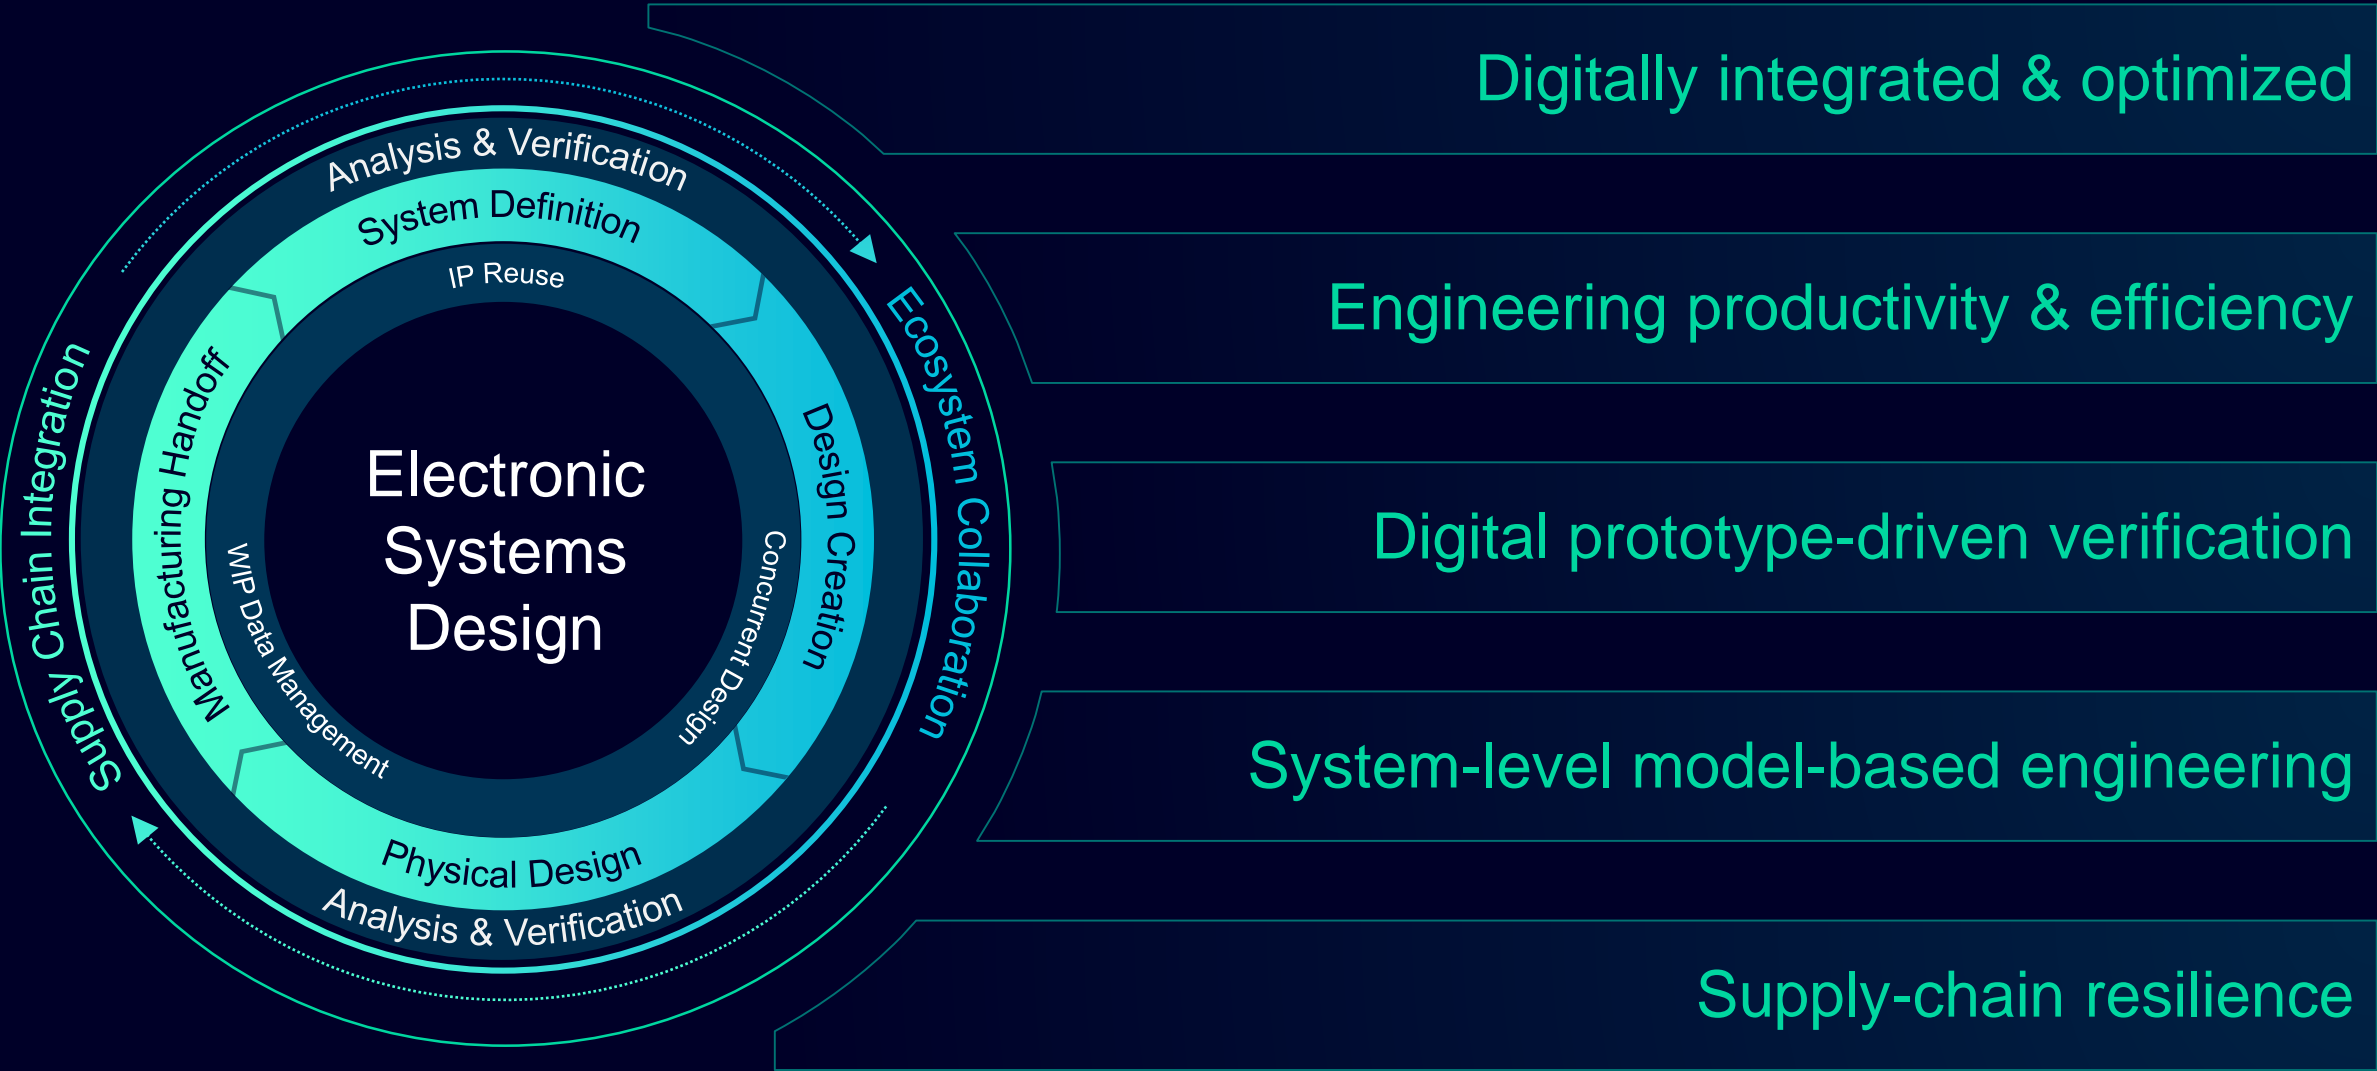

# What we do and what our customers do

# Next-generation systems design platform

We can win  
in FY'22!

# Assuring IC integrity

Targeting critical hardware verification challenges

## Functional Correctness

Rigorous coverage-driven functional verification from block to chip, leveraging formal technology

## Safety

Automated FMEDA flow requiring minimal fault simulation

## Trust and Security

Automated detection of RTL Trojans and hardware vulnerabilities to adversary attacks

## RISC-V

Proof of compliance to instruction set architecture (ISA) with no gaps or inconsistencies

OneSpin 360® Formal Platform

OneSpin Solutions and Services

# Siemens Embedded Solutions for RISC-V

## Toolchain Services

### Offering

- Toolchain customization and optimization services
- Toolchain custom support services

### Unique value proposition

- GCC and LLVM open source compiler framework expertise
- Deep expertise in heterogeneous multi-core and accelerator offload
- 20 years of OSS toolchain dev., upstreaming and support experience

### Areas of expertise

- Super Computer / HPC Platform Enablement
- Toolchains for RISC-V customized processors
- High Performance Embedded Computing
- Long term support for safety critical applications

## Embedded Linux®

- Both pre-built enterprise and highly customizable variants available
- Software customization and optimization services
- Support for the full life cycle of the device
- Rich graphics enablement
- Broad processor support
- Security monitoring

### Flex OS

- Source code based Embedded OS
- Highly customizable
- Aligned with latest semiconductor company provided LTS Kernels

### Omni OS

- Enterprise-class Embedded OS
- Pre-built Debian distribution
- Civil infrastructure platform kernel
- Compatible with Debian package feeds
- Real-time

## Nucleus® Real Time Operating System

- Deployed in over 3 billion units shipped
- Portable & configurable, provided with source code
- Highly scalable, from 32 bit microcontrollers to 64 bit multicore SoC's
- Integrated with Embedded IoT Framework
- Advanced Multicore support: an IPC framework & hypervisor

### Nucleus ReadyStart

- Extensive connectivity and middleware
- Integrated power management framework
- Process model
- Symmetric multi-processing
- Royalty free

### Nucleus SafetyCert

- Certified to
  - IEC 61508 SIL3
  - IEC 62304 Class C
  - ISO 26262 Level D
- DO-178C Level A artifacts

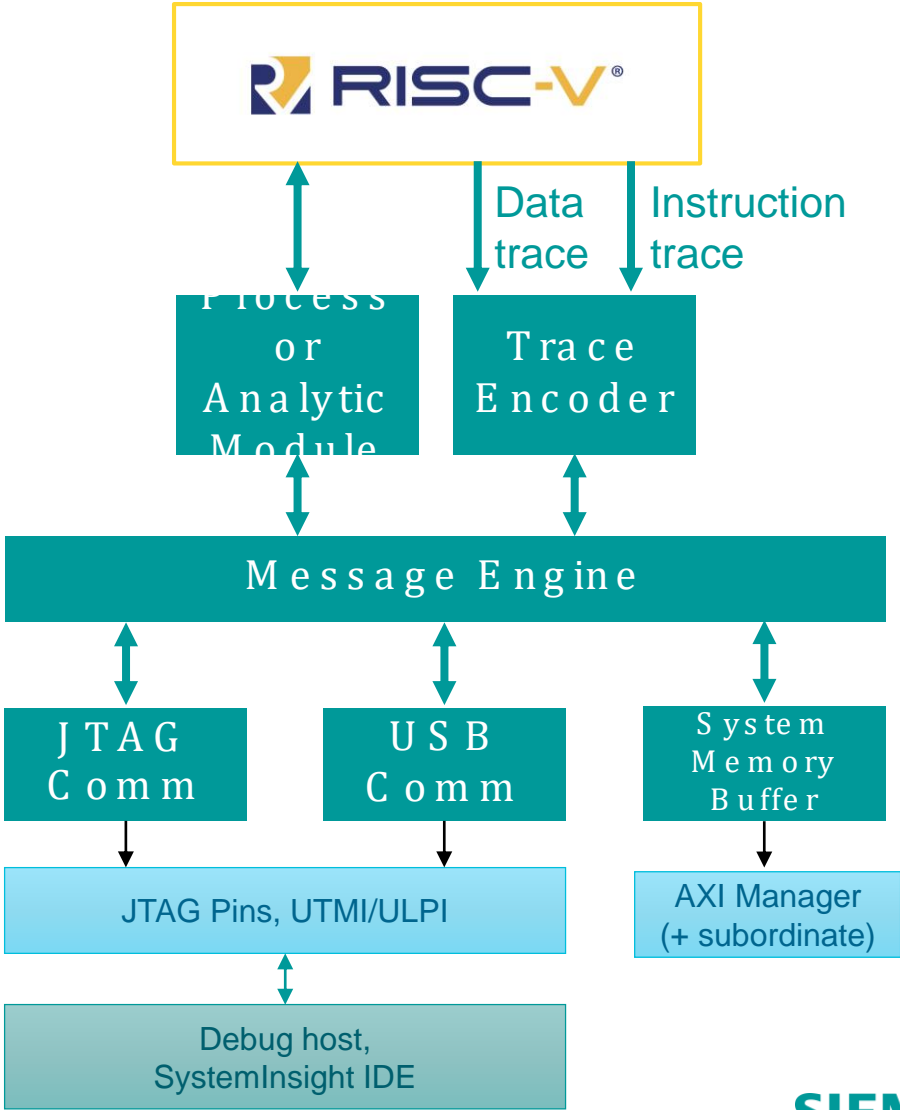

Tessent™ Embedded Analytics - at the forefront of RISC-V support

The first commercially available, standards-compliant and core independent RISC-V trace solution

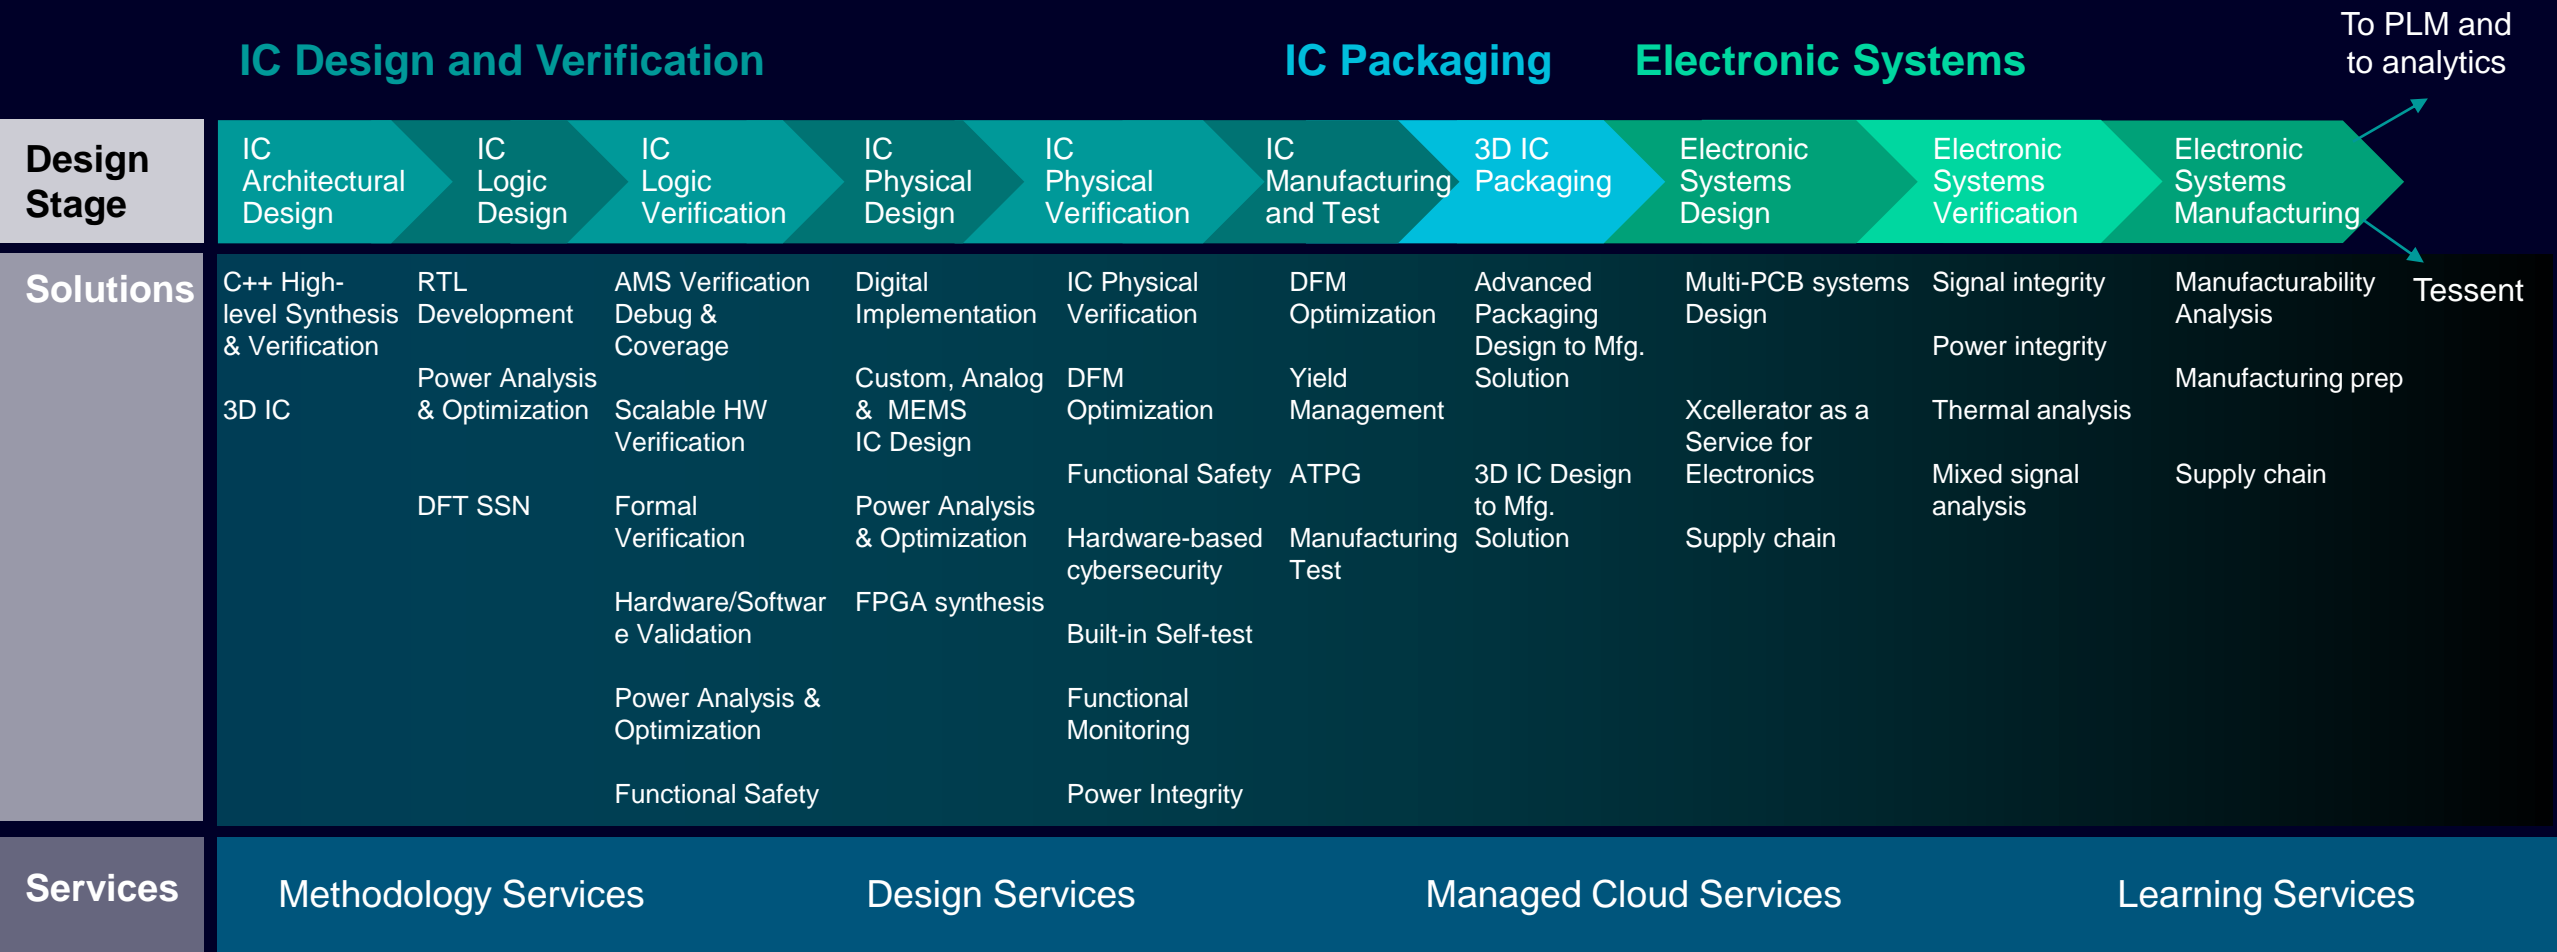

EA Trace Encoder Features

Feature	Standard RISC-V	Tessent Embedded Analytics Trace Encoder
Trace	✓	✓
Filters	✓	✓
Counters	✗	✓
Timestamps	✓	✓
Comparators	✓	✓
